ABOUT ME

Highly analytical finance and accounting professional with 8 ACCA exemptions and a Master's in Quantitative Methods. I combine a strong foundation in financial audits and reporting with advanced statistical modeling and programming skills. Proven ability to optimize financial processes, mitigate risks, and translate complex data into actionable strategic insights.
EU-PASSPORT. NO VISA SPONSORSHIP NEEDED. **Available for immediate relocation to Ireland, with guaranteed accommodation in Dublin**

WORK EXPERIENCE

Ikaria Asesores – *Financial Consultant* **Madrid** January 2025 – Current

- Executed in-depth financial analysis of tenant turnover across a large-scale commercial portfolio using Excel, successfully detecting anomalies, mitigating financial risks, and recovering revenue for property owners.
- Managed international client portfolios across four European markets (Spain, Italy, Holland, Portugal), conducting on-site reviews and delivering data-driven presentations to C-level management to enforce contractual compliance and maximize asset profitability.

Ikaria Asesores – *Junior Financial Auditor* **Madrid** September 2024 – January 2025

- Conducted comprehensive internal financial audits and prepared financial statements (P&L, Balance Sheet) for leading commercial real estate firms, ensuring strict regulatory compliance.
- Executed detailed budget variance analysis and resolved accounting discrepancies prior to final reporting, safeguarding data integrity and directly supporting management's strategic decision-making.

Sugraf – *Accounting & billing Internship* **Zaragoza** October 2022 – June 2023

- Managed the end-to-end invoicing process and maintained debtor ledgers within the ERP system, actively supporting the finance team with accurate month-end reconciliations.
- Acted as the primary point of contact for billing queries, effectively resolving discrepancies to facilitate timely payments and maintain strong client relationships.

PROJECTS IN FINANCE & STRATEGY

Prosegur Cash – *Graduate Project Consultant (ESG & Viability)* **Madrid** March 2024 – June 2024

- Performed a comprehensive financial viability analysis for a corporate Carbon Footprint Reduction strategy, focusing on fleet electrification and solar technology integration.
- Developed operational forecasting models to quantify expected carbon emission reductions and deliver actionable cost-saving recommendations to management.

Invesco – *Graduate Project Consultant (Quant Strategy)* **Madrid** January 2024 – March 2024

- Designed an innovative Exchange-Traded Fund (ETF) by conducting advanced quantitative modeling and historical backtesting using Python and Excel to optimize asset weighting.
- Presented the quantitative strategy to Invesco management, resulting in the ETF's selection for future client offerings based on its robust sector correlation analysis.

N26 Bank – *Graduate Project Consultant (Quantitative Researcher)* **Madrid** September 2023 – December 2023

- Developed a robust client 'Well-being Index' utilizing MATLAB for complex statistical modeling and validation of large-scale survey datasets.
- Translated complex statistical findings into actionable strategic insights, presenting the final analytical report at N26 headquarters and achieving publication in major national media.
