

## ABOUT ME

Finance and accounting professional with hands-on experience in financial auditing, portfolio analysis and quantitative modeling. I hold a Master's in Finance specialized in Quantitative Methods and a background in computational mathematics, with programming skills in Python, MATLAB and R. Experienced working across international markets and presenting data-driven insights to senior stakeholders. Currently based in Dublin, open to opportunities in financial services and related industries. EU passport holder.

## WORK EXPERIENCE

### Spark Foundry – Client Associate

Dublin June 2026 – Current

- Manage end-to-end month-end billing and reconciliation across three high-value client accounts, including one of the agency's largest FMCG portfolios, ensuring 100% accuracy and audit-readiness on a monthly basis.
- Extract and analyze campaign and financial datasets using agency reporting tools to generate performance insights, supporting Client Managers in strategic decision-making and client-facing presentations.
- Monitor Purchase Orders and budget pacing across multiple accounts, coordinating with Channel Planning and Investment teams to identify and resolve billing discrepancies prior to final client reporting.
- Ensure all media plans and financial records are fully aligned with client billing cycles, maintaining strict compliance with internal accuracy standards across a multi-client portfolio.

### Ikaria Asesores – Financial Consultant

Madrid January 2025 – May 2026

- Executed financial analysis of tenant turnover across a large-scale commercial real estate portfolio, achieving an 85-90% incidence detection rate and recovering audit costs at a 65-70% recovery rate across client accounts.
- Managed international client portfolios across four European markets (Spain, Italy, Holland, Portugal), conducting on-site reviews and delivering data-driven presentations to C-level management to enforce contractual compliance and maximize asset profitability.

### Ikaria Asesores – Junior Financial Auditor

Madrid September 2024 – January 2025

- Conducted internal financial audits for 10+ commercial property owner associations managed by leading real estate firms, ensuring full regulatory compliance and accuracy of financial statements prior to annual shareholder meetings.
- Identified and resolved accounting discrepancies in provisions and accruals during audit fieldwork, preparing P&L and Balance Sheet statements that were delivered clean to management boards with zero material misstatements.

## FINANCE PROJECTS

### Prosegur Cash – ESG & Financial Viability Analysis

Madrid March 2024 – June 2024

- Conducted a financial viability analysis of a carbon footprint reduction strategy for a multinational cash management company operating across 20+ countries, identifying the vehicle fleet as responsible for over 60% of total group emissions.
- Developed financial forecasting models to quantify the cost and savings impact of a four-phase solar panel rollout across the global electric fleet, projecting annual energy savings of nearly €40M and a reduction of over 4.7M kg of CO2 by full deployment.

### Invesco – Quant ETF Strategy

Madrid January 2024 – March 2024

- Designed a global equity ETF across three high-tech subsectors (Semiconductors, Aerospace & Defence, Quantum Computing) comprising 33 stocks, applying quantitative screening criteria including market cap, ESG scores and R&D investment ratios using Bloomberg data.
- Conducted 5-year historical backtesting using Python and Excel, achieving a simulated total return of 157% vs a benchmark of 121%, with a Sharpe ratio of 1.18% and Alpha of 0.33 over benchmark, resulting in the fund's selection by Invesco management for future client offerings.

### N26 Bank – Client Well-being Index (Quantitative Researcher)

Madrid September 2023 – December 2023

- Developed a multi-layered Financial Well-being Index for N26 Bank using fuzzy logic inference systems in MATLAB, processing 14 financial variables across dimensions including income stability, debt management, liquidity risk and retirement savings to generate a single client profile score.
- Presented the statistical methodology and findings at N26 headquarters, with the research subsequently published in major national media.
